Creative Young Artist Philharmonic Band  
Works Part time at  
Graves RC Hobbies  
4814 North Orange Blossom Trail, Orlando, FL 32810  
Sponsored Pilot of  
Remote Control Airplanes:  
Mentors band students at Andrew Jackson Middle School  
Mentors and performs in air shows aimed at educating younger upcoming pilots.  
Helps Organize and set up many flying events including F3J, F3K and F3B contests. He is  
always on hand to mentor and help new pilots learn the art of flying.

**Planned Major-** Engineering (most likely electrical). Minor in business. Long- term goal is a Masters in Business Administration (MBA).

### **School and Community Activities**

From the start in 2009 until 2016 I have participated many band functions playing the Tuba and Sousaphone. This journey started in "The Big Red Band" at Jackson Middle School located in Titusville, Florida. With the Big Red Band I was able to experience the feelings and journeys of working together to achieve success, putting together many concerts including Disney featured live shows, which allowed me to achieve first chair tuba position in the top band, and earning a spot in a competitive "All-County" Band. The All-County band was a wonderful experience where you prepare an excerpt and then compete with all other schools and middle school musicians in the county for a spot to be in this ensemble. The playing of these two instruments continued into a well-renown band with top awards in the state of Florida- "The Terrier Sound." This band can be found at Titusville High School. As in middle school, I was able to work and achieve the spot in the top ensembles of the entire band- first chair tuba player. During my time in this band, I was also lucky enough to audition for the community's full orchestra. Again, the audition led me to first chair tuba player among students from multiple counties. I was also able to audition and participate in the All- County band again, this time in the high school edition of the ensemble.

During my middle and high school years, I have been a part of the National Honor Society (6 years). In this we function as a whole to help in the community where we base our values off of these character traits: Scholarship, Character, Leadership, and Community Service. This year I have been honored to have been elected the National Honor Society President by my peers. As President I have organized all events of this year's Honor Society along with my cabinet, speak in front of large groups of people (peers, society members, parents, the community, community leaders). One of my biggest milestones that I have set for the Honor Society is extending our tutoring system to reach out to other schools in our county; specifically, to neighboring Elementary schools.

In addition to National Honor Society (NHS) during high school, I am a member of Mu Alpha Theta Math Honor Society (4 years). As in NHS, Mu Alpha Theta prides itself on helping in the community, tutoring in all math subjects, and organizing many school events. This year I was honored to have been elected by my peers to be on the cabinet of this society as Historian. As Historian I have been able to help organize this year's events and bring ideas that will be implemented to help next year run more fluently.

This past year, my final year in high school (2016-2017), I competed on the Titusville High School Swim and Dive Team. This team is known for being extremely consistent and competitive at meets and state levels. As a team, we finished our season undefeated. Individually and in my first season ever, I was able to take the 100 meter Breaststroke and 1-meter Diving onto two post-season events, ultimately finishing at Districts.

I am currently attending Eastern Florida State College as a full-time honors student. I will be taking the Spring and Summer semesters at this college where I will finish through calculus, chemistry, and physics courses before finishing my engineering degree and business minor at the University of Central Florida. I will be entering the University level as a Junior- the third of a four year degree.
