

CIAM FAI
Report on RC Soaring Subcommittee Activities
from April to November 2002

RC Soaring – (F3B/F3J) – Tomas Bartovsky

The RC Soaring Subcommittee has 26 members. In the Subcommittee there were invited all people who were appointed by their NAC's and who offered their E-mail addresses.

F3B

The discussion concerning the new winch testing procedure continues. There are no other serious problems in this class. Unfortunately this year we had no bid for organizing Continental Championship neither European nor other.

F3J

The World Championship at Lappeenranta Finland confirmed the popularity of this class. The World Cup included seven competitions; in Euro Tour were run fourteen events. During the World Championship a Technical Meeting with team managers was organized. Two problems have to be solved: 1) the reasoning for new working time and 2) very small differences between results of top pilots.

Tomas Bartovsky
Chairman, RC Soaring Subcommittee
